APPLIED AI ARCHITECT

10+ years Solution Architect & AI Product transition expert with experience building scalable systems, AI-driven platform, and compliance infrastructure for global consumer products. Strong blend of deep technical expertise and customer-facing leadership, with a proven ability to translate complex technical concepts into practical, production-ready solutions that drive real business impact. Experienced leading cross-functional initiatives across engineering, product, legal, operations, and external stakeholders, including engagements with European DSA committees, Ireland regulators, Ernst & Young auditors, India grievance officers, enterprise partners such as Air Canada, Southwest, and Japan Airlines, as well as individual end users and operational teams worldwide.

KEY SKILLS

LLM & Product Integration | AI-Native Product Transformation | Cross-Org Leadership & Governance
Client & Stakeholder Engagement | Business Consultant | Global Distribution Systems
Operation Cost & Workflow Optimization | Automation Enablement | Tooling Strategy

EXPERIENCE

META, Sunnyvale, CA

June 2023 - Present

Senior Solution Architect, Central Product Core Systems

- Led the strategy and development of AI-enhanced human review systems used for **scaled regulatory operation, Meta AI compliance**, global legal requests and business integrity.
- Defined the product vision and roadmap for a next-generation AI-driven workflow platform, successfully **deprecating an 8-year legacy system** and implementing a scalable, modular operational system across Meta's family of apps.
- Partnered with AI/ML teams to translate model capabilities into products, including deploying vision-language models to replace traditional OCR, improving scaled operation legal review accuracy from **40% to 98%**.
- Led end-to-end delivery of **15+ backend products/features** supporting regulatory requirements across 11 regions globally, achieving **100% on-time delivery with zero compliance gaps**.
- Drove the compliance system design **from 0-1** unblocked AI product launches (Meta AI, Meta Search Engine) while preserving user experience and regulatory integrity.
- Drove product operation system migration strategy, **moving 60% of manually process** to new systems with **automation and AI facilitate**, minimizing disruption and accelerating adoption across multiple orgs.
- Directed platform-level decisions involving APIs, orchestration, routing, and ranking algorithms, boosting system integration **efficiency by 85%** and cutting new product onboarding time **from 2 months to 3 weeks**.

META, Sunnyvale, CA

January 2021 - June 2023

Senior Program Manager, Systems Infra

- Architect end-to-end **Monetization Appeal system from 0-1**, ensuring technical scalability, robustness, and user monetization experiences with Meta standards.
- Analyze, map, and redesign Meta blue badge verification **from free to profitable products**, identify pain points and opportunities for authenticity automation.
- Led cross-functional alignment across **15+ teams with 100+ members** (Sales, Financial, Engineering, Product, Legal, Ops etc.), acting as product decision-maker in ambiguous, high-stakes regulatory environments.
- **Specialized in optimizing user experience** by consolidating three different platforms into one product, reducing tooling fragmentation, eliminating hidden dependencies, and decreasing manual overhead while resolving technical debt.

AMADEUS, Boston, MA

October 2017 - December 2020

Product Owner, Subject Matter Expert

- Owned product design and delivery of large-scale payment platform for Air Canada PSS, Southwest Loyalty, supporting **189K+ daily transactions** across complex airline systems.
- Launched customized payment solutions for enterprise clients, scaling one solution across 12 Asian airlines and generating **~\$130M in revenue**.
- **Optimized system performance and directed 7 new technical flows**, from concept to active deployment, identifying synergies of legacy and proposed solutions.
- **Improved payment workflows and system flexibility**, enabling support for digital wallets and tokenized payments.
- Acted as an intersection **between external customer, business department and engineering team**, driving requirements gathering, prioritization, and delivery execution.

NEW ORIENTAL AND TECHNOLOGY, Wuhan, China

June 2013 - May 2015

Business Consultant

- Consolidated customer requirements by evaluating business impacts, **delivering strategic recommendations to over 100 clients annually**, and tracking progress to ensure deadlines and budget goals were met.
- **Managed the launch of new online and mobile product K-12 Series**, supporting business operation of education services through ecommerce channel.
- **Led a team of 5** to achieve a **30% revenue increase** in summer 2015 and earned the "Annual Progressing Business Consultant" title by analyzing seasonal sales data and proposing sales strategy.
- **Proposed business strategies and led execution of plan** for marketing department, identified 3 potential business expansion opportunities.

ADDITIONAL RELEVANT EXPERIENCE

SENKO ADVANCED COMPONENTS, Marlborough, MA

June 2017 - September 2017

Summer Internship

- Partnered with QA teams to analyze sales, warehouse, and logistics data, generate daily business reports, and deliver technical training following database migration

WORCESTER POLYTECHNIC INSTITUTE, Boston, MA

March 2016 - May 2017

Research and Teaching Assistant

- Supported research initiatives under Dr. Elizabeth Long Lingo focused on organizational behavior, cross-functional leadership and human-centered organizational transformation across global networks.
- Coordinated research and academic operations including data analysis, project organization, lecture support, tutoring, and student engagement, helping improve course delivery for large student cohorts.

ORACAL LAB, Shenzhen, China

June 2016 - August 2016

Summer Internship

- Analyzed and cleaned project data, generated A/B test reports, and gained hands-on experience with data warehouse migration and system transition processes.

EDUCATION

Master of Science (MS), Information Technology

Worcester Polytechnic Institute, Worcester, MA, US

Bachelor of Science (BS), Electrical Engineering

University of Virginia, VA, US

Bachelor of Science (BS), Electrical Engineering

China Three Gorges University, Yichang, Hubei, China
